HOW TO; FIND A 'PRODUCT NEWSLETTER' OR PNLM – Product Newsletter Marine.

- Open the Sales Support Tool

- Select Applicable Application Either Marine Leisure or Marine Commercial, remember some new products are used in both applications others may be application specific (try both if you can't find what you're looking for in the selected application).

Press and hold 'CTRL' and hit F (Opens the 'Find' function in your browser) enter a key word relating to your search, in this example I was looking for the DPI External Filter so I used the Key Word 'Filter'.

External Filter Solution for DPI - Updates in Version 2 of PNL 574.2

Due to component sourcing challenges, the earlier communicated Start of Ordering and Start of Delivery in PNL 574.1 are no longer valid. The new Start of Ordering and Start of Delivery are valid for all External Filter Solution Sales IDs.

Introduction of change

Start of Ordering	Week 15 2024	~~was Week 38 2023~~
Start of Delivery	Week 19 2024	~~was Week 42 2023~~

External Filter Solution for DPI

The External Filter Solution (EFS) allows for DPI transmission oil change without lifting the vessel out of the water. EFS may be ordered with new engine sales or as an aftermarket kit for existing DPI drives.

Background
The External Filter Solution (EFS) enables exchange of DPI transmission oil and oil filter from inside the engine room. Thereby, EFS will eliminate the need for lifting the vessel out of the water for DPI oil and oil filter exchange. EFS will give increased uptime and reduced service costs for vessels that are not regularly lifted and for vessels with high yearly usage.

How it works
The transmission oil filter, oil cooler and connection points for oil fill/drain are mounted on the engine rear. The kit also contains parts that shall be mounted inside the DPI drive. Installation instructions will be enclosed in the kit and will also be available for download from the Product Center.
